## TOPICS

### OF THE CONFERENCE

- Methods for reliability and probabilistic safety assessment
- Sensitivity analysis
- Data collection and analysis
- Hydrogen Embrittlement
- Design and evaluation of technical systems and structures
- Design innovation for safety and reliability
- Codes, standards and safety criteria
- Engineering Structures
- Structural Integrity and durability
- Management and life-cycle performance
- Models for ageing and life extension
- Fatigue, fracture and damage mechanics
- Damage evaluation and fatigue design
- Dynamic and fatigue reliabilities
- Safety assessment (loads and environmental effects; material properties; prediction of response and performance)
- Analytical and numerical simulation
- Structural health monitoring
- Rock and soil structural integrity
