Izvod

Izvod je TNR 10 italic, jedan ili više paragrafa, koristiti raspored tastature Serbian Latin. Prvi red u paragrafu je uvučen 0,4 cm.

Abstract

The abstract may have one or more paragraphs in TNR 10 italic. The first paragraph line is indented by 0.4 cm.

INTRODUCTION (heading 2, ALL CAPS TNR 10)

Text should be in **two columns**, 8.5 cm (3.35") each, with 0.6 cm (0.24") space between them, with the exception of certain figures and tables (see below).

Margins for all pages should be set to 2.7 cm (1.06") **top** and **bottom**, and 1.7 cm (0.67") **left** and **right.**

Use font TNR (Times New Roman) 10. The first line of each paragraph is indented by 0.4 cm (0.16").

Sub-chapters (heading 3 – TNR 10 italic)

The *style – tekst* from the *template* is already defined.

**Equations** can be centered or aligned to the left and their numbers are aligned to the right of column. For example:

$$\dot{\gamma}_{ab}^{HP} = \frac{3}{2\bar{S}}\left[\frac{1}{H}\left(\dot{\bar{S}} + \frac{\partial f}{\partial \theta}\dot{\theta} \right) + B\bar{S}^n \right] S_{ab}^D \qquad (1)$$

This document template also has a pre-defined *style – formula*, with a paragraph spacing of 2 pt, before and after.

Equations are to be prepared with Word's *Equation Editor* or by *MathType*. Parameters for equation typing are the size 10 pt TNR; subscripts and superscripts 8 pt, sub-subscripts are 8 pt. Numbers, parantheses and capital Greek symbols are not *italic*. All latin type variables *A, B, X, Y, a, b, x, y* as well as small Greek symbols α, β, γ are *italic*, and the vector and matrice symbols $\boldsymbol{\Gamma}$, **A**, **X,** are in TNR Bold. Operators i functions are also not *italic*, e.g.

$$\sin\left(\frac{a}{b}\right), \ln(x), \max, \min, \lim_{x \to 0} f(x) \qquad (2)$$

Symbols of chemical elements and units of measure for physical quantities are also not *italic*.

$$C_2H_2 + O_2 \Rightarrow 2C + H_2 + O_2 + 0.255\,MJ/mol \qquad (3)$$

Figures are centered and may take the space of both columns if it is necessary, (style style *slika*). The text on figures must be readable. Please use font sizes 9 pt on figures. This *template* example has a pre-defined style

potpis slike for the **figure captions** of 9 pt TNR, and also the style *potpis tabele* for **Table captions** in TNR 9 pt. **Figures and Tables** must not be duplicated when the paper is presented in both Serbian and English. The text in **Tables** is TNR 9 pt, and is centered in table columns and uses the style *tekst tabele*. See examples below.

Figure 1. Example of a figure

Table 1. Example of a table

		Large	Small
Surface crack		LSC	SSC
Crack depth	*a*	2.5	1
Crack length	*2c*	8	8
Crack tip	*r*	0.1	0.1
WM length		2	2

Literature or references are cited in the text by number in large parantheses, e.g. [1-3,5,7,13]. List the **References** (or **literature**) at the end of paper in TNR 9 pt. Use automatic numbering with the *style literatura*. See the example below.
