Seven Board meetings are held in 2011, always with additional participants. The organisation of seminars and forums, participation at conferences, and issues dealing with the DIVK journal “Structural Integrity and Life” and other DIVK editions and some other issues were discussed at these meetings.

### Journal “Structural integrity and life”

The journal IVK has reached the rank of leading journal of international importance (class M24) in 2011 and was financed by the Ministry of Education and Science. Activities were undertaken to improve the current rating, and to extend citations.

The journal report 2011 was prepared and presented at the Annual DIVK meeting.

### Ostala izdanja DIVK

2011 je iz štampe, u izdanju DIVK, izašla monografija: *Pressure equipment integrity assessment by elastic-plastic fracture mechanics method*, autora Aleksandra Sedmaka, Stojana Sedmaka i Ljubice Milović. Prva promocija ovog izdanja bila je na 56. međunarodnom beogradskom sajmu knjiga (29. oktobra 2011). Za članove DIVK i sve druge zainteresovane, održana je i promocija ovog izdanja DIVK na Tehnološko-metalurškom fakultetu u Beogradu (9. novembra 2011). Sva DIVK izdanja sufinansiralo je Ministarstvo prosvete i nauke, kao i pomažući članovi DIVK.

- GOŠA FOM, Sm. Palanka
- Konmat, Beograd

#### Učešće DIVK u radu ESIS

Plaćena je članarina DIVK za ESIS. Šezdeset pet članova DIVK članovi su ESIS preko DIVK.

#### Finansijski izveštaj 2011

DIVK je u 2011. ostvario skromne prihode od članarine, pre svega od pravnih lica - pomažućih članova DIVK, jednog broja pojedinačnih članova DIVK i Instituta za ispitivanje materijala, reklame pojedinih kompanija u časopisu IVK, te doprinosa Ministarstva za prosvetu i nauku (MPN), koje je učestvovalo u sufinansiranju izdavačke aktivnosti DIVK i članarine DIVK u Evropskom udruženju za integritet konstrukcija (ESIS), ali su ukupni troškovi štampanja (drugi troškovi nisu ni evidentirani) i iznos same članarine, kao i troškova njene uplate bili u većem iznosu od primljenih sredstava za te namene.

Poslovi pripreme časopisa IVK za štampu uključujući recenzije i redakciju, zatim administrativni poslovi (uključujući finansije) i sve drugo se u DIVK obavlja volonterski.

Izrazit je problem nedovoljnog i neredovnog prihoda, koji bi, u celini, povećali prihode DIVK i mogućnost ulaganja u ciljeve za koje je osnovan, odnosno afirmaciju teorije mehanike loma i unapređenje njene praktične primene.

### Other DIVK editions

In 2011, the monograph: *Pressure equipment integrity assessment by elastic-plastic fracture mechanics method* by Aleksandar Sedmak, Stojan Sedmak and Ljubica Milović, has been published by DIVK. The first promotion was on the 56<sup>th</sup> International Belgrade Book Fair (October 29, 2011). For DIVK members and others who were interested, there was a promotion of this DIVK issue at Technological and Metallurgical Faculty in Belgrade (November 9, 2011). All DIVK editions are co-financed by the Ministry of Education and Science, as well as supporting members.

#### Supporting Members of DIVK in 2011

- HE Bajina Bašta
- Institut IMS; Belgrade
- GOŠA FOM, Sm. Palanka
- Konmat, Belgrade
- Kolubara Metal, Lazarevac

- GOSA Institute, Belgrade

#### DIVK participation in the work of ESIS

DIVK paid membership fees for ESIS. Sixty-five DIVK members are members of ESIS through DIVK.

#### Financial Report 2011

In 2011 DIVK made a modest income from membership fees, primarily for the legal persons - supported members, a number of individual members and the Institute for Materials Testing, certain companies advertising in the IVK journal, and the contribution of the Ministry of Education and Science (MES), who participated in co-financing and publishing activities and DIVK membership in the European Society for structural Integrity (ESIS), but overall printing costs (other costs are not recorded) and the amount of the fees and expenses of its payments are exceeding the received funds for this purpose.

Preparations of the IVK journal, including reviews and editorial staff, administrative tasks (including finance), and everything else in DIVK is mostly done voluntarily.

A typical problem is insufficient and irregular income, which would, in general, increase revenues and DIVK ability to invest in the goals for which it is established, and it is the affirmation of the theory of fracture mechanics and improvement of its practical application.
